## 🔧 TOOLS AND TECHNOLOGIES

- HTML, CSS, PHP
- C, Java, JavaScript, Kotlin
- MySQL, Mongo DB, Firebase
- MERN Stack
- Github
- Postman
- Figma, Canva

## 🧠 SKILLS

- Full Stack Web Development
- Mobile App Development
- WordPress Development
- Problem Solving
- Team Player
- Quick-Learning

## 🪪 PROFILE

- I am a 3rd Year undergraduate at SLIIT, following *BSc in Information Technology (Specializing in Software Engineering)* degree program. [CGPA 3.61]
- Seeking an internship on Full Stack Software Development in a well reputed company to utilize my skills and to gain some real-world experience in a challenging and motivating working environment.
- I have had some hands-on experience in developing web apps to mobile apps. Apart from that I am also quite good at designing.

## 📂 PROJECTS

### Online Examination System ⧉

- Developed the Students Dashboard and Feedback Section.
- Here the student can view and edit his certain details, view the enrolled modules, attend the online exam and view the results of his past exams done through the system.
- The student is also able to send any feedback regarding the exam.

*#Java Servlets #JSP #MySQL #Bootstrap*

### HRMS - Resource Management ⧉

- Developed the Resource Management component in this HR system.
- Here all the resources in the company which can be either devices or stationeries, can be managed easily, by entering the available quantity, supplier details, and also to assign employees to a particular resource.
- It is also equipped with a search functionality and also reports can be generated based on the available quantity and the number of employees assigned to a resource.

*#MERN-(MongoDB, Express, React, Node) #Bootstrap*

### E-Wallet - Bank Management ⧉

- Developed the Bank Management component in this E-Wallet Android App.
- Here the user can have multiple bank accounts and manage the respective transactions of each bank account separately.
- It is also equipped with a search function so that a particular transaction could be searched easily.

## 🌐 LANGUAGES

English

Sinhala

Tamil

**Personal Portfolio Website** ⎘
- This is my personal portfolio website.
- Developed this using only client-side technologies (React).
- Mobile responsiveness is another factor considered here, so it can be viewed from any smartphone screen easily.
- The contact me form is connected with Email JS, so once someone submits the form, it will be delivered to my personal email.

*https://github.com/iamakmal/portfolio*

*#React JS #Material UI #Bootstrap*

**Online Land Sale System** ⎘
- Developed the submit request form, edit request form and My Posts section.
- In the My Posts section the user can see all the posts, he has posted which includes both the request posts and sale posts.
