Team Player

PROFILE

A dedicated, hardworking and an enthusiastic individual, looking forward to work in the IT industry. Seeking an internship on Software Development in a well reputed company to utilize my skills and to gain some real world experience in a challenging and motivating working environment. Currently I am an undergraduate at SLIIT, following BSc in Information Technology (Specializing in Software Engineering) degree program. Curiosity to learn new things is what keeps me motivated. I believe that I will be a valuable asset to your company.

PROJECTS

Online Land Sale System

https://github.com/ravii-sa/landsale
(HTML/CSS/PHP/MySQL)
This group project was for the IWT module in the 1st Year 2nd Semester. I developed the submit request form, edit request form and My Posts section where the user can see all the posts, he has posted which includes both the request posts and sale posts.

Online Examination System

https://github.com/Arudchayan/Online-Examination-Management-System
(Java Servlets, JSP, MySQL, Bootstrap)
This group project was for the OOP module in the 2nd Year 1st Semester. I developed the Students Dashboard and Feedback Section, where the student can view and edit his certain details, view the enrolled modules, attend the online exam and view the results of his past exams done through the system and also to send any feedbacks regarding the exam.

HRMS - Resource Management

https://github.com/SLIITITP/y2_s2_wd_it_01-itp_wd_metro_01
(MERN-MongoDB, Express, React, Node, Bootstrap)
This group project was for the ITP module in the 2nd Year 2nd Semester. I developed the Resource Management component, here all the resources in the company which can be either devices or stationeries, they can be managed easily, by entering the available quantity, supplier details, and also to assign employees to a particular resource. It is also equipped with a search functionality and also reports are generated based on the available quantity and the number of employees assigned to a resource.

E-Wallet - Bank Management

https://github.com/IT21292422/WalletApp-PilotSquad
(Android Studio, Kotlin, Firebase Database)
This group project was for the MAD module in the 2nd Year 2nd Semester. I developed the Bank Management component. Here the user can have multiple bank accounts and manage the respective transactions of each bank account separately. It is also equipped with a search function so that a particular transaction could be searched easily.
