TOOLS AND TECHNOLOGIES

- HTML, CSS, PHP, JavaScript
- C, C#, Java, Python, Kotlin
- React, React Native
- MERN, Spring Boot, ASP. NET
- MySQL, Mongo DB, Firebase
- GitHub, Postman
- Figma, Canva

SKILLS

- Full Stack Web Development
- Mobile App Development
- Problem Solving
- Team Player
- Quick-Learning

PROFILE

- I am a 3rd Year undergraduate at SLIIT, following *BSc in Information Technology (Specializing in Software Engineering)* degree program. [CGPA 3.61]
- Seeking an internship on Full Stack Software Development in a well reputed company to utilize my skills and to gain some real-world experience in a challenging and motivating working environment.
- I have had some hands-on experience in developing web apps to mobile apps. Apart from that I am also quite good at designing.

PROJECTS

Online Examination System ⧉

- Developed the Students Dashboard and Feedback Section in this web application, adhering to MVC architecture.
- Implemented features allowing students to seamlessly view and edit personal details, access enrolled modules, participate in online exams, and review results from past exams through the system.
- Additionally, facilitated a user-friendly feedback mechanism for students to provide insights on the examination experience.

#Java Servlets #JSP #MySQL #Bootstrap

E-Wallet - Bank Management ⧉

- Developed the Bank Management component in this E-Wallet Android App.
- Here the user can have multiple bank accounts and manage the respective transactions of each bank account separately.

https://github.com/IT21292422/WalletApp-PilotSquad

#Android Studio #Kotlin #Firebase Database

HRMS - Resource Management ⧉

- Developed the Resource Management module in the HR system, leveraging REST API principles.
- This component enables seamless management of company resources, including devices and stationeries.
- Users can easily handle inventory, supplier details, and assign resources to employees.
- The system features a search functionality and generates insightful reports based on resource quantity and employee allocations.

https://github.com/IT21292422/HRMS-Resource-System

#MERN-(MongoDB, Express, React, Node) #Bootstrap

Fresh Connect Mobile App ⬀
- A mobile app connecting customers with local farmers nearby.
- Developed the customer dashboard, where a customer can view the farm shops, the products in each shop and also the chat feature where the customer can chat with the farmer.
- Used Firebase for backend and along with that used React Native Magnus for styling.

https://github.com/IT21292422/Fresh-Connect
#React Native #Expo #Firebase

CodeMe - Discussion Forum ⬀
- Developed the Discussion Forum in the CodeMe web application which was developed as a platform for novice programmers to learn coding.
- Used Firebase for backend and along with that used Daisy UI for styling.

https://github.com/IT21292422/Code-Me
#Next.Js #TypeScript #Firebase

Personal Portfolio Website ⬀
- This is my personal portfolio website, developed this using only client-side technologies (React).
- Mobile responsiveness was considered, so it can be viewed from any smartphone screen easily.
